

# MUHAMMAD NAEEM AKRAM

Senior iOS Developer | Swift & SwiftUI | Crypto Wallet & FinTech

Dubai, UAE | +971 55 524 9285 | naeem.akee@gmail.com | linkedin.com/in/naeemakee

---

## PROFESSIONAL SUMMARY

Senior iOS Developer with 7+ years of experience architecting secure, high-performance mobile applications across Crypto Wallet, FinTech, Telecom, and marketplace domains. Expert in Swift, SwiftUI, Combine, and async/await, with deep hands-on experience in blockchain wallet security (BIP-39, Secure Enclave, Keychain, biometrics) and WalletConnect integration. Proven record of shipping feature-rich apps serving millions of users, improving retention and performance through clean MVVM and Coordinator architecture, robust testing, and CI/CD automation. Strong collaborator in Agile teams focused on scalable, testable, production-grade code.

## TECHNICAL SKILLS

**Languages:** Swift, SwiftUI, UIKit, Objective-C

**Frameworks & Reactive:** Combine, async/await, SwiftData, CryptoKit, CommonCrypto, LocalAuthentication

**Architecture:** MVVM, MVVM-C (Coordinator), VIPER, Clean Architecture, SOLID Principles, Dependency Injection

**Blockchain & Security:** BIP-39 Mnemonic, WalletConnect v2 (Reown), Multi-Chain Wallets (Ethereum, BSC, Polygon, Base, Tron, Solana, Bitcoin), Transaction Signing, Secure Enclave, PBKDF2, SSL Pinning, Keychain, Biometric Authentication

**Data & Networking:** Core Data, URLSession, REST APIs, Alamofire, UserDefaults, Firebase, WebSocket

**Tools & CI/CD:** Xcode, Git, GitHub, GitLab, Fastlane, GitHub Actions, Jenkins, Jira, Swift Package Manager, CocoaPods

**Integrations:** Push Notifications, Deep Linking, In-App Purchases, Maps, VoIP, Chat, Stripe, AppsFlyer, HealthKit, Localization, QR Scanning

**Testing:** XCTest, Unit Testing, UI Testing, Performance Profiling

## PROFESSIONAL EXPERIENCE

---

### Token 13 Software L.L.C (Dubai) – Senior iOS Developer

April 2025 - Present

- Architected [TokenB Explorer](#), a self-custody crypto wallet in SwiftUI spanning 8 blockchain networks (Ethereum, Solana, Bitcoin, Tron, and more), with BIP-39 seed-phrase generation and on-device transaction signing via a custom Rust SDK.
- Hardened key security using Secure Enclave key wrapping, PBKDF2, and biometric-protected Keychain (Face ID/Touch ID) with SSL pinning.
- Integrated WalletConnect v2 (Reown) and built an in-app Web3 DApp browser with live market data over a Combine and async/await data layer.
- Established the app's MVVM + Coordinator architecture and CI/CD pipeline with Fastlane and GitHub Actions.

### DulSoft Limited (Remote) – Senior iOS Developer

Sep 2023 - April 2025

- Developed secure, responsive interfaces for the MEO Arena and [Photo iD](#) apps using SwiftUI.
- Implemented biometric login, offline caching, and API integration with robust unit testing.
- Reduced app crash rate by 30% through improved memory management and test coverage.

### Evamp & Saanga (Pakistan) – Senior iOS Developer

Oct 2021 - Sep 2023

- Rebuilt the [Jazz World \(SIMOSA\)](#) app UI, improving user retention by 15% across 10M+ users.
- Integrated 90+ RESTful APIs, deep links, and analytics events.
- Delivered the Bakcell and Nar+ carrier apps, serving 5M+ and 4M+ users respectively.
- Led CI/CD pipelines with Jenkins and managed GitLab release workflows.

### Xenex Media (Australia) – iOS Developer

May 2019 - Oct 2021

- Built the [FreshFeelz](#), [GoCycle](#), and iCentra apps from scratch with advanced UI/UX flows.
- Created reusable modules and implemented in-app payment systems and localization.

## KEY PROJECTS

---

### [TokenB Explorer](#) – Multi-chain cryptocurrency wallet (iOS, SwiftUI)

- Self-custody wallet with BIP-39 seed phrases, Secure Enclave + biometric Keychain protection, and SSL pinning.
- WalletConnect v2 DApp connectivity and an in-app Web3 browser across 8 blockchain networks.

### [Jazz World \(SIMOSA\)](#) – Telecom super-app for Jazz Pakistan (10M+ users)

- Built the core UI and 90+ API integrations for balance, bundles, bill payments, and credit transfers.
- Added deep linking and push notifications, contributing to a 15% increase in user retention.

### [GoCycle](#) & [FreshFeelz](#) – Health/fitness and wellness marketplace apps

- GoCycle: real-time GPS tracking and HealthKit integration; reduced load time 40% and lifted engagement 25%.
- FreshFeelz: real-time booking platform with Stripe payments and loyalty rewards; improved conversions by 35%.

### [Photo iD](#) – Field documentation app for contractors and inspectors

- Real-time photo capture, jobsite documentation, voice-to-text labeling, timestamping, and instant PDF export.
- Used Firebase and Core Data for offline sync; reduced documentation time by 40%.

## EDUCATION

### Bachelor of Computer Science – Software Engineering

*University of Gujrat, Pakistan (2015 - 2019) – Attested*

## LANGUAGES

English (Fluent) | Urdu (Native) | Arabic (Beginner)
